# BP MONITOR BLOOD PRESSURE BP 09N MONITOR

**Nearly 25793\* people Die & 156000\*\* people become disable every day due to raised Blood Pressure (Soures - WHO, GHO)**

**Blood pressure chart for adults**

High blood pressure (hypertension) can quietly damage your body for years before symptoms develop. Left uncontrolled, you may wind up with a disability, a poor quality of life or even a fatal heart attack. Roughly half the people with untreated hypertension die of heart disease related to poor blood flow (ischemic heart disease) and another third die of stroke.

Treatment and lifestyle changes can help control your high blood pressure to reduce your risk of life-threatening complications.

## Few Tips for Safety

Relax

Practice meditation

Exercise regularly

Eat healthy
